

SNORKELING IN SILFRA FISSURE

YOUR GUIDE TO SNORKELING IN THE MAGICAL VISIBILITY WONDERLAND

Silfra fissure is one of the most amazing places one can visit in the world. Diving or snorkeling through the crystal clear glacial water is an experience like no other as Silfra fissure is actually the only place in the world where you can go diving or snorkeling in between the tectonic plates. The visibility is so great it almost feels like you are flying. But before you take the plunge, there are a few things we want you to know.

SNORKELING

The experience of snorkeling in Silfra is otherworldly and probably the most exciting adventure you will do in Iceland. It does not require any certification or previous snorkeling experience, the only requirements are that you can swim independently and are in good physical shape.

“Lazy current”

Running through the fissure is a slow beautiful glacial water current. For the first half of the snorkeling experience, you will float along in the same direction as the current. For the second half, you might have to swim against this slight current, this is not challenging, but does require that you are able to swim.

Age limit for snorkeling:

The minimum age for snorkeling in Silfra is 12 years and minors under the age of 18 need to be in the company of a guardian. Although there is no upper age limit elderly people in bad physical shape are advised against joining the tour.

MORE INFORMATION ABOUT SNORKELING IN SILFRA

Snorkeling in Silfra is a beautiful experience that we would love to share with you. However, it is important that you are aware of a few facts about the adventure you are planning on taking.

This is why we would kindly like to ask you to read thoroughly this section and evaluate if you accept the following.

- ➡ Snorkeling in the Silfra fissure involves a moderate level of exercise.
- ➡ The dry suit has seals on the neck and wrists that stop water from getting in, a very good thing when entering glacial water but these need to be quite tight and if you are claustrophobic this might be a little uncomfortable.
- ➡ The time spent snorkeling is about 30-45 minutes and the water temperature is 2° Celsius so it's best to eat and drink before the tour starts.
- ➡ Although you might have realized, since this is a snorkeling tour we still want to mention that your face, hair and hands will get wet during this activity.
- ➡ Outside temperatures in Iceland can be quite cold. This country is not named Iceland for no reason. Note that you will spend up to 3 hours outside. Dress accordingly and make sure you have warm thermals, winter coat, hat and gloves during the winter.
- ➡ Participants cannot wear any types of jewellery in the water, as sharp items can break the dry suit.
- ➡ There are no locker rooms at Silfra. Please do not bring any valuable items that you don't need for the tour.
